**LISTING OF CLAIMS**

Claim 1. - Claim 15 (Canceled)

16. (Currently Amended) A peritoneal dialysis apparatus comprising at least one dialysis fluid container filled with a dialysis fluid, a dialysis fluid circuit containing at least one drained fluid container for recovering the dialysis fluid, fluid delivery means for delivering the dialysis fluid with said dialysis fluid container as a start point or said drained fluid container as an end point, input means for inputting dialysis conditions, and display means for displaying the inputted dialysis conditions,

wherein dialysis is performed by delivering the dialysis fluid to a patient by said delivery means and recovering the drained fluid;

said apparatus further comprising:

means for selecting a temporary separation mode during therapy to temporarily stop the therapy;

means for temporarily separating said delivery means from said dialysis fluid circuit during said temporary separation mode, said means comprising an aseptic separating/joining apparatus; and

means for displaying a residual staying time after the temporary separation mode is selected.
